

# Sage 50 Accounts 2015

## New Features

This ½ Day course is designed for existing users of Sage 50 Accounts (2014 and earlier) so that they may become accustomed to the newest version of the software.

### Course Outline

- **New User Interface**
  - Quickly navigate between ledgers
  - Dynamic Toolbar
  - Find tasks
  
- **Backup Manager**
  - Schedule regular unattended check data and back up routines.
  - Check your data and back up while users are still logged in to the software.
  - Manage backups for all companies through a single console.
  - View users logged in to any companies
  
- **Inactive Accounts**
  - Mark records as inactive to hide them from list views
  - switch accounts between active and inactive
  
- **Windows Selection Method**
  - Choose how to select multiple records in a list
  
- **Access Rights Refresh**
  - Add new users
  - Remove users
  - Allow or remove access to modules in the software
  - Copy access rights from one user to another
